

**LAMELIO**  
WALL PANELS

---

## FREQUENTLY ASKED QUESTIONS

---

### **What material are the panels made of ?**

The panels are made of polystyrene.

---

### **What is the length of the panels ?**

Approximately 270 - 272 cm. Measure and cut the panels to the appropriate length.

---

### **How wide are the panels?**

About 12 cm. Full technical data can be found on our website [www.lamelio.pl](http://www.lamelio.pl)

---

### **How to install the panels?**

We recommend using Lamelio mounting glue. Detailed assembly instructions can be found on our website.

---

### **How to cut panels?**

We recommend cutting the panels using a jigsaw, miter saw or table saw.

---

### **When does the client need finishings slats?**

If the slats are installed in the central part of the wall, the sides are visible.

---

### **Are the panels waterproof?**

Yes, the panels are waterproof. They can be installed in the bathrooms and humid rooms, but we do not recommend installing them under a direct stream of water.

WALL PANELS

## FREQUENTLY ASKED QUESTIONS

### **Can panels be installed on a fireplace?**

Yes, provided that the fireplace casing is made of fireproof board (GK) and the surface temperature does not exceed 60 degrees. We also recommend using Lamelio glue for wet surfaces

### **Can panels be installed outdoor?**

We do not recommend installing the panels on the facade due to weather conditions.

### **Can the slats be mounted on the ceiling?**

Yes, the panels can be mounted on the ceiling.

### **How to calculate the number of panels needed for a given wall width?**

Use our configurator to calculate the number of panels needed.

### **How many panels is enough for 1 tube of glue?**

One tube of glue is enough to glue about 5 panels.

### **Can the panels be painted?**

We have created a dedicated Infinity Collection for painting.

### **How to clean panels?**

We recommend cleaning the panels with a damp microfiber cloth, without detergents.
